Tuner Trucks: Magic Colors

Do Over: Paint Your Car With Ease, Again And Again And Again...

MIKE SUTTON

Published Date: 8/16/04

Jaw-dropping custom paint is the best way to get your ride noticed, but what if you could have a different custom paint job every month? Enter Magic Colors' Remove It Permanent Paint System.

Magic Colors paint is a durable and quasi-permanent paint system that can be applied and removed in minutes. It works on various surfaces including metal, concrete, ceramics and plastics, and is available in several colors.

Defying preconceived notions of automotive paint, Magic Colors paint, according to the manufacturer, adheres to a vehicle's finish with no priming or prepping necessary and is biodegradable and harmless to the vehicle's original finish. The process: Apply paint, give it five to 10 minutes to dry, and then enter your local car show. Or just stare at it in awe.

If you grow tired of the design, remove it and start over. Though durable enough to last through two years of abuse, the paint wipes or washes off in minutes after the special Magic Colors remover breaks down the polymers in the paint.

Magic Colors was a featured product at this year's NOPI Nationals, where airbrush artists turned the finish of everyday vehicles into custom works of art. The U.S. military uses Magic Colors to paint its tanks for desert war games and Euro Disney uses it to paint props.

The company can match colors to your needs. For details go to magiccolors.net or call (800) 849-9015.
